Aarti Kumari

Java Full Stack / Backend Developer | Spring Boot | Microservices | Production Support

+91 9113422730 | aartikjha365@gmail.com | Bangalore, India | linkedin.com/in/aarti-kumari-636bb325b | leetcode.com/u/aartikjha365

PROFESSIONAL SUMMARY

Java Developer with 1+ year of hands-on experience building, debugging and supporting enterprise applications using **Java 8/11/17, Spring Boot, Hibernate/JPA, RESTful APIs, Microservices and React**. Delivered 60+ production REST endpoints, cut API response time by 30% with Redis caching and query tuning, and reduced deployment time by 50% with Docker and CI/CD. Strong in **root cause analysis, log-based troubleshooting and structured debugging**; comfortable working with cross-functional teams under tight SLAs in Agile (Scrum) environments.

TECHNICAL SKILLS

Backend: Java 8/11/17, Spring Boot, Spring MVC, Spring Data JPA, Hibernate/JPA, Spring Security, RESTful APIs, Microservices Architecture, Maven
Frontend: React, JavaScript (ES6+), HTML5, CSS3
Microservices & Messaging: Spring Cloud (Eureka, Config, API Gateway), Resilience4j, OpenFeign, RestClient, Apache Kafka, Redis
Monitoring & Support: Log4j structured logging, log analysis, Root Cause Analysis (RCA), production debugging, JIRA
Database: SQL, MySQL, RDBMS, JDBC, Query Optimization, Indexing, Transaction Management
DevOps & Cloud: Docker, Git, GitHub, CI/CD Pipelines, Apache Tomcat, AWS (EC2), GCP
Security, Testing & Core: JWT, OAuth2, HMAC-SHA256, RBAC, JUnit 5, Mockito, Integration Testing, TDD, Postman; OOP, SOLID, Design Patterns, Multithreading, DSA

PROFESSIONAL EXPERIENCE

Associate Engineer – Java Developer Feb 2026 – Present
NVIDIA Bangalore, India

- Developed and supported **50+ secure REST APIs** for payment and authentication workflows using Java 17, Spring Boot and Spring Data JPA, with Spring Security, request validation, HMAC-SHA256 verification and global exception handling.
- Improved performance by **30%** through Redis caching and by tuning MySQL queries, indexes and JPA fetch plans; **eliminated N+1 query patterns** to lower database load under concurrent traffic.
- Built fault-tolerant microservices with Netflix Eureka, Spring Cloud Config, RestClient and **Resilience4j Circuit Breaker**, reducing cascading failures during downstream outages.
- Debugged code and traced end-to-end request flows across services to identify root causes and deliver defect fixes and enhancements.

Java Developer Oct 2025 – Feb 2026
Husys Consulting Limited Bangalore, India

- Designed a **microservices-based architecture** with Spring Boot and Docker, cutting deployment time by **50%** and improving scalability across internal platforms.
- Integrated services into **CI/CD workflows** with Maven and Git; applied design patterns (Factory, Builder, Strategy) to reduce coupling and improve testability.
- Added **Log4j structured logging** that shortened mean time to resolution (MTTR); delivered sprint goals in Agile (Scrum) and tracked defects in JIRA.

Java Developer – Intern Mar 2025 – Oct 2025
KodNest Bangalore, India

- Shipped **10+ backend REST APIs** using Java, Spring Boot, Spring Data JPA and Spring Security with JWT authentication, following MVC architecture and Hibernate ORM.
- Raised unit and integration test coverage to **85%** with JUnit and Mockito, reducing post-release defects.

PROJECTS

Stripe Payment Integration System 2026
Java, Spring Boot, Spring Cloud, Redis, MySQL, Docker

- Built a secure microservices-based payment platform with Spring Boot, Spring Security and Spring Data JPA, using layered validation plus HMAC-SHA256 authentication.
- Integrated Stripe Checkout API and webhooks; used **Redis idempotency** to guarantee exactly-once processing on duplicate callbacks.
- Delivered 5+ fault-tolerant microservices using Eureka, Spring Cloud Config and Resilience4j, with centralized exception handling and optimized MySQL persistence.

EDUCATION & CERTIFICATIONS

M.C.A., Sir M. Visvesvaraya Institute of Technology, Bangalore 2022 – 2024 | CGPA: 8.68/10
Certifications: Java Developer – KodNest | Google Cloud Computing Foundations – NPTEL
